

The Compactus system (introduced to Australia by Brownbuilt in the 1950's) pioneered the concept of shelving with a moveable access aisle. The Office Compactus (a direct development of the original) followed suit to meet the growing needs for space-saving and efficient filing systems in the office environment of the 1960's.

Specifically designed for high density storage, it's become the most popular rolling storage unit on the market. Many Australians have come to realise that an upgrade to this system of office management is a worthy investment in their future growth.

**The BOC-A Compactus** offers storage capacity equivalent to 10 four drawer filing cabinets and reduces the floor area dedicated to storage by up to half.

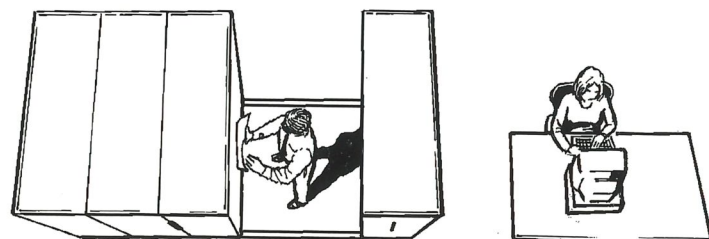

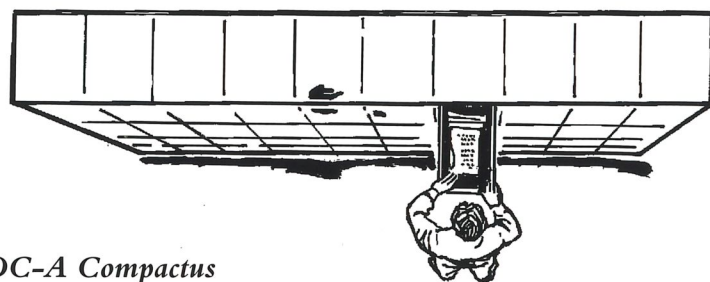

## A Five Star Storage Solution.

Amongst the Office Compactus' many benefits two significant features stand out:

**SPACE:** Compact storage means that costly floor space is saved.

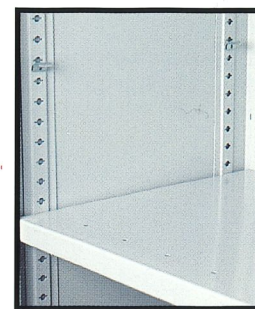

**TIME:** File access is quicker due to better organisation and centralised storage.

"User friendly" is the operative term with the Office Compactus. Everything is designed for complete integration into any office environment. The modular platform base means there's no need for floor preparation, the attractive furniture finish complements any office interior design and a huge range of filing accessories make the complete storage system.

### Cabinets

- Internal bolted assembly
- Quality exterior furniture finish
- Flush-fitting cabinets
- Finished in a range of durable powdercoat colours
- Welded internal shelf support strips
- 25mm vertical adjustment for shelves and accessories
- Range of heights/widths/depths to maximise space utilisation

### Mobiles

- Welded steel units
- Supported by sealed bearing load wheels for ease of movement
- Lateral guide wheels to prevent cabinets tipping
- Pre-punched to allow installation of metal shelf divider plates
- Tandem linking kits fitted to the base and mobiles allow Office Compactus units to be installed as/or extended to two (2) bays wide

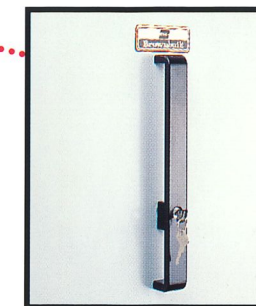

### Base

- Welded prefabricated steel base modules
- Two (2) standard base lengths with option to cut-down base sections for non-standard configurations
- Adjustable feet to compensate for uneven floors and minimise floor preparation for installation
- Welded steel channels form a self contained track supporting cabinets and mobiles
- Lateral guide channels, to accommodate mobile lateral guide wheels, act as anti-tilt mechanism for the cabinets
- Lacquered pineboard floor sections form a durable, stable work surface

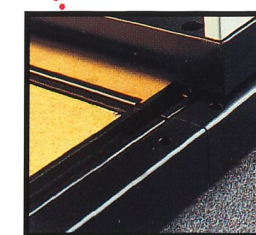

### Storage

- 325mm and 425mm deep bays for filing/storage flexibility and space utilisation
- Compatible range of accessories with Brownbuilt cupboards and shelving due to common interior module dimensions
- All accessories easily relocated being retained by simple adjustable clip systems
- Filing systems include: -
  - Compartment filing
  - Open-box filing
  - Shelf file rack dividers
  - Roll-out foolscap suspension filing
  - Roll-out reference shelves
  - Suspended lateral filing
  - Hookfiling
  - Computer binder storage
  - Magnetic tape storage

### Locking

- Standard single-point, internal, key-activated locking mechanism fixing into platform base
- Optional overhead locking system for greater security
- S.C.E.C. endorsed class B & C security units available to government departments and agencies

## Individually tailored to meet the demands of any office.
